

# ELITE RINSE AID

- ✓ NO STREAKS
- Sector Fast Drying
- SPARKLING GLASSES

#### PROPERTIES

Appearance: Clear Liquid

Odour: Pleasant

pH Values: 11.5

Specific Gravity: 2.0 +/-0.5

Flammability: Non-flammable

#### STORAGE

Store in original container locked in a cool dry well-ventilated place. Do not store with food stuffs.

#### CONTAINS

Organic acids & nonionic surfactants.

#### ALWAYS WEAR THE APPROPRIATE PPE: SAFETY GLASSES, GLOVES, GUMBOOTS, OVERALLS

## **AUTOMATIC DISHWASHER RINSING AID**

**ELITE RINSE AID** is a unique blend of specialised sequestering agent, surfactant, acid, and rinsing aid for use in automatic dishwashers. It is low foaming with excellent wetting properties providing free rinsing, sparkling crockery. It prevents water spotting by allowing water to sheet off flatware, glasses, and dishes. Combined with the use of hot water this sheeting effect ensure a fast-drying time. Manual drying by towels is not required so no labour cost and no cross-contamination from the use of towels.

### DIRECTIONS

- For use in the Domestic Machines, Institutions, Hospitals, Catering Outlets, Rest Homes, Hotels & Motels, Canteens, and Restaurants.
- In domestic dishwashers the rinse additive is dispensed from a small reservoir unit which must be kept full. For home use, tip into dishwasher's rinse aid compartment to dispense appropriate amount into the final rinse cycle.
- For industrial and institutional applications, meter into ware wash machine, using an automated injector system that adds the product to the final rinse. It can be introduced during the rinse cycle at a very low concentration of 10-15 mL/50L of water via automatic dosing equipment.

#### **APPROVALS**

MPI APPROVED C31 (All animal product except dairy).
