

GEN 5

- ✓ POWERFUL PATHOGEN CONTROL FOR HIGH-RISK AREAS
- ✓ SPECIALISED FOAMING FORMULA
- ✓ IDEAL FOR DRAINS & GULLY TRAPS
- ✓ NON-CAUSTIC
- ✓ SAFE APPLICATION

TYPICAL APPLICATIONS

Deep treatment Antimicrobial protection for High Risk Areas. Food processing, production, food safety & hygiene areas where powerful bacterial control is required.

PROPERTIES

Appearance:
Blue coloured liquid

Odour:
Typical

pH Values:
7-8 pH

Characteristic:
Contains less than 20% actives

Special Storage:
None required

Safety:
No specialised application needed

APPLICABLE ON: FLOORS, DRAINS, FOOTBATHS

ALWAYS WEAR THE APPROPRIATE PPE: SAFETY GLASSES, GLOVES, GUMBOOTS, OVERALLS

REORDER

Specialised Pathogen Control

Gen 5 is a highly effective surface sanitiser developed to control a wide range of pathogens including Listeria in food processing facilities. The unique formulation allows easy application by spraying equipment including knapsacks.

PERFORMANCE

Exterior Mould/Moss Treatment:

Dilute 1L with 6L of water. Use a Napsack Sprayer to apply. Allow to dry.

Heavy Pathogen Infestations (drains):

Dilute 1L with 4L of water. Leave in drains overnight. Then rinse with water.

Footbaths:

100mls per 10 litres of water = 800ppm

Plant Sanitising:

50mls per 10 litres of water = 400ppm

SAFE PRACTICE

- Saturate the surface to be treated by spray
- Heavy infestations may require a second treatment
- All food contact surfaces must be thoroughly rinsed with potable water before production recommences
- If used to control biofilm application should be carried out fortnightly.

APPROVALS

MPI APPROVED C41 (all animal products except dairy)
